

Chapter 32

Quick Export

Once you’ve finished your program and you want to share it with others, you can use the Quick Export button to output the contents of the Timeline as a self-contained file in one of a variety of different formats in order to share it with people.

Quick Export

You can choose File > Quick Export to use one of a variety of export presets to export your program from any page of DaVinci Resolve. You can even use Quick Export to export and upload your program to one of the supported video sharing services, including YouTube, Vimeo, and Dropbox.

To use Quick Export:

- 1 (Optional) In the Cut, Edit, Fusion, or Color page, set In and Out points in the Timeline to choose a range of the current program to export. If no timeline In or Out points have been set, the entire timeline will be exported.
- 2 Choose File > Quick Export.
- 3 Select a preset to use from the top row of icons in the Quick Export dialog, and click Export.
- 4 Choose a directory location and enter a file name using the Export dialog, then click Save. A progress bar dialog appears to let you know how long the export will take.

The Quick Export dialog showing a custom preset

To Create a New Custom Preset and Add it to Quick Export:

- 1 On the Deliver page, select Custom Export from the Render Settings, and adjust the Video, Audio, and File settings for your new preset. Only Single Clip settings can be made Custom Presets, not Individual Clips.
- 2 In the Render Settings 3-Dot Option Menu, select Save as New Preset.
- 3 Type in a name for your new Preset, and choose a preset icon to represent it.
- 4 Check the Add to quick export box.
- 5 Click Save.

Your preset and icon will now be added to the Quick Export dialog across all pages of DaVinci Resolve and also be added to the Render Settings in the Deliver page.

The List View icon (circled) in the Quick Export dialog

To View the Quick Export Options in List View:

- 1 Open the Quick Export dialog.
- 2 Click on the List View icon in the Render Settings.

Assign Icons to User Presets

When you create a new Custom Preset in the Deliver page, in addition to entering a name, you can now choose an icon from the list to represent it in the Render Settings and Quick Export dialog.
